Bay,
 Oyster Condition Indices Files

Frank,

Ok, I've separated the two files as requested. I just placed on
the NODC anonymous ftp site, 2 files including a text version of
the documentation including station locations and methods for the
oyster condition indices data, and the .xls spreadsheet file
containing the data.

Files Sent;

1) wilapa2.txt   (9 kb)

2) cidata.xls   (49 kb)

Best Regards,

Sid
