**Additional  
Information**

**Suggested QC flag from Data Provider:** NA

**Additional Comments:** No ship data for YrDay intervals of 191.53-191.56, 192.59-192.63, and 192.95-193.03. For these intervals, the SST was estimated by subtracting 0.22 deg C from EQU-T. For the first two intervals, the salinity and barometric pressure were interpolated between good values. For the last interval, the salinity was assigned a value of 36.1 psu and barometric pressure was assigned a value of 1016.5 mbar.
