Hi Sheri,

Attached are the files associated with a survey exploring the presence or absence of acroporid corals marked by handheld GPS during snorkel or tow surveys of shallow water (<5m) reef habitats in the Upper Florida Keys National Marine Sanctuary (USA)

Thanks,  
Sarah

The product is available:

I've attached the original data files we've received to this email

The data can also be found online -

The only change I made to the directory was to swap out the revised FGDC metadata Margaret provided for the survey
