Subj: Transfer of HX182 CTD Data Set

Doug:

I have placed on the NODC anonymous ftp site, a total of 2 files, including 1 data file and it's associated metadata entry form (see below). Please use this as a replacement file for the HX182 data set submitted under NODC accession no. 9500030. The original file had less than 13 stations. This file contains 61 stations and includes the oxygen and fluorometer data along with the depths, temps., and salinities data. The data set was received via the Univ. of AK/IMS and the IMS DataBase web server. These are "mixed ocean" data.

Files Sent:

1) Data File

hx182s_dat.ctd (180 kb)

2) Metadata Entry Form

hx182met.inv (1 kb)
