Predictive Services Discussion: - Moisture from the monsoon will continue to increase over the Northwest, northern Great Basin, and Northern Rockies as upper-level ridging amplifies over the West and western Canada with upper-level troughing off the West Coast. Scattered mostly wet thunderstorms and showers are likely in far northern California, northward along the Cascades, and into central and northern Idaho and western Montana. Heavy rainfall is likely in portions of Oregon into Idaho, especially along the track of the upper low. Scattered to widespread wet thunderstorms are expected across the Great Basin, Sierra, southeast California, Southwest, Colorado, and Wyoming. Dry and breezy conditions are likely for portions of the northern Plains into Minnesota within a post-frontal airmass. Cloud cover will reduce temperatures across portions of the Northwest, northern Great Basin, and Northern Rockies, but some areas could reach well above normal temperatures. Strong thunderstorms are possible across portions of the Great Lakes.

SAFECOMs

Aviation Category

What the SAFECOM system is:

The Aviation Safety Communiqué (SAFECOM) [AMD-34/FS-5700-14](#) should be used to report any condition, observation, act, maintenance problem, or circumstance with personnel or the aircraft that has the potential to cause an aviation-related mishap. SAFECOMs are a tool used to identify, document, track, and correct safety-related issues.

What the SAFECOM system is not:

- NOT intended for initiating punitive actions.
- NOT to be used as a complaint system or for personal attacks.
- NOT used by contracting officers for contract evaluations/award purposes.
- NOT a substitute for on-the-spot corrections to a safety concern.
- Does NOT replace the requirement for initiating an accident or incident report.

SAFECOMs provide the necessary feedback for development of the following communication tools and documents:

- Accident Prevention Bulletins
- Lessons Learned
- Safety Alerts
- Technical Bulletins
- Airwards
- Information Sharing Memos
- Maintenance Deficiencies (Airworthiness Directives (AD), Service Bulletins (SB), etc.)
- Safety Trends
- Training Needs
